

Medical Retina

2 – 6 February 2015, Lugano/Switzerland

Scientific coordinators: Borja Corcóstegui, Spain; Bruno Falcomatà, Italy

	MONDAY, 2 FEBRUARY 2015	
	A FOCAL POINT ON TAILORED TREATMENT OF DME IN REAL LIFE SITUATIONS	
08:45	Moderate NPDR with CME and: 1) well defined leaking points and 2) CME with leakage from undefined source and no tractional component	Ali Erginay, France
09:30	CME with evident VMA or ERM in moderate NPDR	
10:00	What if PPDR or early PDR instead of NPDR in the previous 3 CME scenarios?	Sobha Sivaprasad, UK
10:30	COFFEE BREAK	
11:00	What if high risk PDR?	Sobha Sivaprasad, UK
11:30	Non perfused CME	
12:00	Multiple treatment choices for patients with bilateral CME	Edoardo Midena, Italy
12:30	LUNCH	
13:30	Chronic & refractory CME	Edoardo Midena, Italy
	MULTIMODAL IMAGING COMPARISON IN DME	
15:00	Features of naive DME: matching OCT with monochrome, autofluorescence, and angiographic images	Edoardo Midena, Italy
15:30	Hallmarks of response to the therapy and of regression of DME	Sobha Sivaprasad, UK
16:00	Hallmarks of early and late non-responding DME	Ali Erginay, France
16:30	Characteristics of chronic DME	Sobha Sivaprasad, UK
17:00 - 17:30	Imaging beyond SD-OCT in DME	Ali Erginay, France
	TUESDAY, 3 FEBRUARY 2015	
	NEOVASCULAR MACULOPATHIES	
09:00	Early detection of neovascular forms and differential diagnosis (CNV, RAP, PCV, myopic CNV, other forms mimicking CNV)	Giovanni Staurenghi, Italy
09:30	Clinical cases of management of CNV in AMD: the use of Ranibizumab and Aflibercept from clinical trials to clinical practice. Clinical cases of management of PCV: PDT, Ranibizumab, Aflibercept	
10:00	Clinical cases of management of RAP	
10:30	COFFEE BREAK	
11:00	Clinical cases of management of PCV	Giovanni Staurenghi, Italy
11:30	Clinical cases of management of myopic CNV and other CNV	
12:30	LUNCH	
	MULTIMODAL IMAGING COMPARISON IN NEOVASCULAR MACULOPATHIES	
13:30	Peculiar aspects of angiographic and OCT monitoring of RAP and PVP	Giovanni Staurenghi, Italy
14:00	Differentiation between drusen, reticular pseudodrusen, and ghost drusen	Pearse A Keane, UK
14:30	Hallmarks of progression from early to intermediate to advanced AMD	
15:00	Hallmarks of early and late non-responding AMD	
15:30	Imaging features of activity, remission, reactivation of CNV in AMD and myopic CNV	
16:00 - 17:00	Imaging predictive factors of visual results following treatment of early & advanced AMD	

	WEDNESDAY, 4 FEBRUARY 2015	
	MULTIMODAL IMAGING OF MACULAR DYSTROPHIES	
09:00	Diagnosis and evolution of: - Stargardt disease - Best disease - Pattern dystrophy - Cone dystrophy	Gisbert Richard, Germany
11:00	COFFEE BREAK	
11:30	Diagnosis and evolution of angioid streaks	Maurizio Battaglia Parodi, Italy
12:00	Other dystrophies (Sorsby, Doyne, Bull's eye)	
12:30	LUNCH	
	OTHER RETINAL VASCULAR DISEASES	
13:30	Diagnosis and management of: - Mac Tel 1 and 2 - Radiation retinopathy - Coats disease	Gisbert Richard, Germany
15:00	Diagnosis and management of: - Macroaneurysms - Retinal arterial occlusion	Maurizio Battaglia Parodi, Italy
	ME IN RVO	
15:30	From the occlusion of the most little venous vessel to CRVO, standard or tailored treatment if ME ?	Francesco Boscia, Italy
16:30	Indications for a combined treatment	
17:00	Hallmarks of early and late non-responding ME	
17:30 - 18:00	Characteristics of chronic ME	
	THURSDAY, 5 FEBRUARY 2015	
	ME IN RVO	
09:30	Are retreatment criteria for RVO equal, similar, or different from that of DME and AMD?	Dov Weinberger, Israel
10:00	Does the presence of peripheral ischemia influence the choice of ME treatment any more?	
10:30	COFFEE BREAK	
11:00	Vitreoretinal interface in RVO and role of surgery	Dov Weinberger, Israel
11:30	Clinical cases	
12:00	LUNCH	
	ME IN RVO: MULTIMODAL IMAGING COMPARISON	
13:00	Features of naive ME: matching OCT with monochrome, autofluorescence, and angiographic images	Dov Weinberger, Israel
13:30	Hallmarks of response to the therapy and of regression of ME	
14:00	When SD-OCT needs En Face OCT and EDI OCT in RVO	
14:30 - 16:00	Clinical research: concepts and tools	Gabriela Burian, Switzerland
	FRIDAY, 6 FEBRUARY 2015	
	MICROPULSE LASER COURSE	
08:30	Subthreshold laser therapy	Jan Keunen, Netherlands
09:00	Micropulse laser and the differences from other subthreshold laser techniques	
09:30	Setting the micropulse laser: standardized or individualized setting?	Victor Chong, UK
10:00	Techniques of treatment of retinal edema in diabetic retinopathy, RVO, PDR, CSC	
10:30	COFFEE BREAK	
11:00	Doubts during the treatment: am I under treating or over treating? How near can I approach the fovea? How can I be sure that I have not done any photocoagulation?	Victor Chong, UK
11:30	Doubts after the treatment: how long have I to wait to see a response? Retreat or shift to other treatments?	Jan Keunen, Netherlands
12:00	Clinical cases	Victor Chong, UK Jan Keunen, Netherlands
12:30 - 13:00	Certificates and farewell
