

Medical Retina

20 – 24 February 2017, Rome, Italy

Scientific coordinators: Borja Corcóstegui, Spain; Bruno Falcomatà, Italy

	MONDAY, 20 FEBRUARY 2017	
	TREATMENT OF DR AND RVO	
08:45	Welcome session	
09:00	Baseline characteristics of DME predictive of visual acuity and intravitreal therapy response	Patricia Udaondo, Spain
09:30	The place of ranibizumab, aflibercept, and dexamethasone intravitreal implant in the treatment of DME	
10:00	Management of DME demonstrated with case studies	
10:30	COFFEE BREAK	
11:00	- DME with taught hyaloid and/or ERM; indications for surgery? - Mixing and matching PRP and anti-VEGF for PDR treatment	Anat Loewenstein, Israel
12:30	LUNCH	
13:30	ME in DR or RVO and extensive peripheral non perfusion; Impact of anti-VEGF on retina perfusion	Anat Loewenstein, Israel
14:30	ME in RVO: Is there anything (age, imaging aspects, results of trials) that should guide us to the choice of treatment, to the best frequency (monthly, T&E, PRN) of treatment, or when to combine and protocols of combinations therapies?	Patricia Udaondo, Spain
15:15	COFFEE BREAK	
15:45	Vitreoretinal interface in RVO and role of surgery	Anat Loewenstein, Israel
16:15 – 16:45	Cases with RVO	Patricia Udaondo, Spain Anat Loewenstein, Israel
	TUESDAY, 21 FEBRUARY 2017	
	UVEITIS	
09:00	Main entities of infectious uveitis: diagnosis and treatment	Carlos Pavesio, UK
10:00	COFFEE BREAK	
10:30	Main entities of non infectious uveitis diagnosis and treatment	Marc DeSmet, Netherlands
11:15	Management of uveitis-related complications	Elisabetta Miserocchi, Italy
11:45	Clinical cases	Carlos Pavesio, UK Marc DeSmet, Netherlands Elisabetta Miserocchi, Italy
12:30	LUNCH	
	IMAGING IN DIAGNOSTIC UVEITIS	
13:30	How to investigate a patient with posterior Uveitis	Carlos Pavesio, UK
14:15	Imaging for ongoing uveitis management	Marc DeSmet, Netherlands
15:00	COFFEE BREAK	
15:30	Advanced imaging of the inflamed choriocapillaris and stromal choroid	Marc DeSmet, Netherlands
16:15 – 17:00	Imaging for diagnostic dilemmas or masquerade syndromes	Elisabetta Miserocchi, Italy

	WEDNESDAY, 22 FEBRUARY 2017	
	OCT INTERPRETATIONS	
09:00	The concept of normality of OCT and OCT-A examination of the retina and choroid	
09:30	OCT: the physics of pathologic signals from the retinal stroma	
10:00	OCT-A: the physics of pathologic signals from the retinal and choroidal vasculature	
10:30	COFFEE BREAK	
11:00	OCT-A: acquisition and interpretation pearls, pitfalls and artefacts	
11:30	- OCT classification of drusen and macular atrophy - OCT features in wAMD - OCT-A features of CNV	Giuseppe Querques, Italy
12:30	LUNCH	
13:30	OCT & OCT-A integrated images for management of wAMD	Giuseppe Querques, Italy
14:00	OCT & OCT-A integrated images for setting an avascular and vascular PED; and for RAP and PCV	Francine Behar-Cohen, France
15:00	COFFEE BREAK	
15:30 - 17:00	- OCT & OCT-A integrated images for management of MMD (Myopic Macular Degeneration) - OCT & OCT-A integrated images for management of ME in DR and RVO	Alexandre Matet, France Francine Behar-Cohen, France
	THURSDAY, 23 FEBRUARY 2017	
	MULTIMODAL RETINAL IMAGE OF RETINAL DYSTROPHIES	
09:00	Retinal and Choroidal vascular diseases: - Type 2 Macular telangiectasia, case studies - CSCR and differential diagnoses	Giuseppe Querques, Italy
10:00	Retinitis pigmentosa case studies	
10:30	COFFEE BREAK	
11:00	Best disease and adult onset foveomacular vitelliform dystrophy case studies	Giuseppe Querques, Italy
11:30	Pattern dystrophy case studies	
12:00	Other retinal dystrophies	
12:30	LUNCH	
	NEOVASCULAR MACULOPATHIES	
13:30	Management of RAP	Srinivas Sadda, USA
14:00	Management of PCV	
14:45	Management of DMM	Maurizio Battaglia Parodi, Italy
15:30	COFFEE BREAK	
16:00	Management of CNV complicating angioid streaks	Maurizio Battaglia Parodi, Italy
16:30 - 17:00	Management of Mac Tel	Srinivas Sadda, USA
	FRIDAY, 24 FEBRUARY 2017	
	AMD	
09:00	How to assess the progression of dry AMD	Maurizio Battaglia Parodi, Italy
09:30	Therapeutic supplements for non-neovascular AMD	
10:15	COFFEE BREAK	
10:45	Defining the components of AMD: CNV, activity of neovascularization, fibrosis, area of geographic atrophy, edema and other stromal alterations	Maurizio Battaglia Parodi, Italy
11:30	Prognostic parameters in anti-VEGF therapy for neovascular AMD	Mariacristina Parravano, Italy
12:00	What we have learned from trials and real world data: the optimal regimen of treatment	
12:30	True and false signs of reactivation of a CNV	
13:00 - 13:30	Test, certificates and farewell
