

Cataract Surgery Online Course

11 November 2025

Webinar

time: 17:00 – 19:00 CET

ESASO Scientific director: Mario Romano

Course Scientific coordinators: Carlos Rocha de Lossada, Vito Romano

Moderators: Carlos Rocha de Lossada, Vito Romano

17.00 – 17.20

Innovations in Cataract Surgery

Explore cutting-edge surgical advancements, including femtosecond laser-assisted cataract surgery (FLACS) and microincisional cataract surgery (MICS). Gain insights into how these techniques improve precision, reduce recovery times, and enhance patient outcomes.

Vito Romano

20 Minutes

17.20 – 17.40

The Evolution of Intraocular Lens Technology

Dive deep into the latest developments in intraocular lenses, from trifocal to extended depth-of-focus (EDOF) designs. Learn how to select the best lens for different patient needs, ensuring optimal refractive outcomes.

Carlos Rocha de Lossada

20 Minutes

17.40 – 18.00

AI and Digital Tools: Transforming Cataract Surgery

Discover how artificial intelligence and digital technology are revolutionizing preoperative planning and intraoperative decision-making. Explore tools that enhance precision and optimize outcomes in complex surgeries.

Mark Lobanoff

20 Minutes

18.00 – 18.20

Masterclass in Complex Cases: Lessons from

Challenging Cataract Surgeries

Analyze complex cataract cases, from subluxated lenses to traumatic cataracts. Learn step-by-step approaches to handle the most demanding scenarios with confidence.

Giuseppe Lo Giudice

20 Minutes

18.20 – 18.40

Overcoming challenges: managing postoperative complications

Master the art of complication management with real-world solutions for common challenges, including posterior capsule rupture and zonular instability. Discuss strategies to reduce complications and ensure surgical success.

Robert Rejdak

20 Minutes

18.40-19.00

Discussion of clinical cases

All Speakers
