

New insights in the treatment of DME and RVO: the goal of the therapy

19 September 2025

WEBINAR

Time: 17:30 - 19:30 CEST

ESASO Scientific Director: Mario Romano

Course Scientific Coordinators: Giuseppe Querques and Riccardo Sacconi

Session Chairman: Francesco Bandello (I)

Moderators: Giuseppe Querques (I) , Riccardo Sacconi (I)

Welcome and Introduction	Francesco Bandello (I)	17:30-17:35 (5 Min.)
The relevance of early intervention in RVO and DME: when to start treatment		
Explain different strategies that could be considered for the treatment starts of DME & RVO (DRCR criteria based on VA; other criteria; clinical practice) Peculiar focus on the relevance of early intervention and its clinical implication.	Giovanni Staurenghi	17:35-17:50 (15 Min.)
DME clinical phenotypes: the personalized medicine approach		
Reporting different treatment strategies for different phenotypes of DME. The relevance of individualized treatment.	Edoardo Midena	17:50-18:05 (15 Min.)
Anti-VEGF and steroids in the treatment of RVO and DME: from clinical trials to real-life experience		
This presentation will focus on different options in the DME treatment. The focus will be on the differences between CT results and real-life.	Marion Munk	18:05-18:20 (15 Min.)
Discussion	All speakers	18:20-18:30 (10 Min.)

Moderators:		
<i>Giuseppe Querques, Riccardo Sacconi</i>		
Fluid fluctuation and damage of long-term vision: the role of DEX implant in rapid and sustained fluid resolution		18:30-18:45 (15 Min.)
Fluid fluctuation is one of the main causes of visual decline during the treatment. DEX implant, with its rapid and sustained fluid resolution, could be a solution of this problem.	Anat Loewenstein	
Biomarkers for switching to Dexamethasone Implant for the treatment of Diabetic Macular Edema in real clinical practice. A multicentric study		18:45-19:00 (15 Min.)
Reporting the results of a real-life experience on how biomarkers could be used for switching DME patients from anti-VEGF to DEX-implant	Josè Maria Ruiz Moreno	
Tip and tricks on combination therapy in RVO and DME		
We have often neglected combination therapy in our clinical practice. An expert will present the role of combination therapy, when to use it, and how to manage it.	Piergiorgio Neri	19:00-19:15 (15 Min.)
Discussion	All speakers	19:15-19:25 (10 Min.)
	Moderators:	
	<i>Giuseppe Querques, Riccardo Sacconi</i>	
Take home message and closing remarks	Francesco Bandello	19:25-19:30 (5 Min.)
